In instances when the required intercooler is not in stock, We can re-core any intercooler in **24hrs... GUARANTEED !!!!**

FUEL TANK MANUFACTURE & REPAIR

Also the Cleaning and Testing of Fuel Tanks

Fuel tank repair can be an extremely dangerous and due caution is needed when applying any kind of heat to a fuel tank. Before repairing a fuel tank it needs to be cleaned thoroughly inside and out so that no fumes remain that could cause combustion once heat is applied. It is highly recommended that only experienced people undertake the task.

G.D.M. has many years experience in the Cleaning, Testing & Repairing of Fuel tanks. Units are tested and if necessary, repaired on a very short lead time saving on vehicle downtime.

ALL TYPES OF WELDING & FABRICATION UNDERTAKEN

All our Welders are hand skilled ASME 9 TIG welders, specialising in Aluminium welding. We also provide welding services for Stainless Steel, Mild Steel & many other types of metals.

CNC Punching and all types of fabrication work also undertaken, ***And All at very competitive prices.***
